

High Capacity Electro-Proportional Throttle Valves

Single-part valve with one part number enhances Sun's flow control product line.

Sun's pilot operated, high capacity, electro-proportional throttle valve expands our growing family of electrically actuated screw-in cartridges and in particular, enhances our flow control product offering. Model **FPHK** is available in 40 and 60 gpm (160, and 240 L/min) capacities.

Features and Benefits:

- Single-part valve with one part number for easy inventory and ordering
- Available in normally closed configuration in either 40 or 60 gpm (160 and 240 L/min) capacities
- Leakage rated at 10 drops/min
- Easy and fast system integration with Sun **embedded controllers**
- Rated at 5000 psi (350 bar)
- Fits Sun's **T-16A** cavity
- Compatible with **HCT** digital controllers

For more detailed information, please visit the **FPHK** product page on the Sun Hydraulics website. In addition, feel free to browse our entire line of **Electro-Proportional Flow Control Cartridges**.

Sun offers flexible delivery schedules to satisfy any required ship date. We invite you to contact your Sun distributor to learn more about available delivery options.

To locate a distributor in your area, please visit our website and select **Where To Buy** at the top of the page. The **Where To Buy** function is easy to use and is searchable by entering a US zip code, selecting a map or country name.
